

# River Rock

## RIVER ROCK – SOUTHSIDE CLASS II PERMEABLE

**Southside Class II Permeable** is a permeable material used for drainage applications and conforms to the specifications of Cal Trans section 68. Contact a sales representative for details.

Located along the Tres Pinos Creek, Southside Sand and Gravel is about a mile west of Tres Pinos, California. (The quarry entrance is off Airline Highway.) The deposit was created by the combined ancestral flow of the San Benito River & Tres Pinos Creek. The site is characterized by extensive deposits of sand and gravel, comprised of granite, dolomite, limestone, sandstone and gneiss materials.
