Contained Wash-Out System

graniterock.com | 1.888.rock.100

environmentally correct

no wash-out area needed

**no costly cleanup issues
at your construction site.**

**Clean Trucks.
Clean Environment.**

Graniterock is pleased to introduce the EnviroGuard Chute Wash System. We are one of the few ready-mix companies in California committed to equip most of our ready-mix trucks with this **completely contained wash-out system.**

No more need for the owner, general or sub contractor to provide a wash-out area for ready mix trucks; thereby eliminating any contamination, haul out or costly cleanliness issues. This service will free the owner of any potential violations of spillage, and **create an “environmentally friendly” jobsite.**

Until now, there was no easy environmentally correct way to wash off the chute on a ready-mix truck. The Chute Wash System allows cleaning of chutes efficiently, without creating an environmental hazard. The stone is retained in the lightweight bucket while the cementitious slurry and is pumped back into the drum.

graniterock.com | [1.888.rock.100](tel:1888rock100)

The driver attaches one end of the hose onto the bucket.

The other end of the hose is attached to the air operated pump. The truck engine compressor is then switched on and supplies the air which turns the pump on.

The driver then proceeds with the chute wash down, using the truck water supply to wash the concrete residue off of the chutes. The wash down should take 4 to 6 minutes to complete.

The slurry water and sand is recycled back into the truck drum while the screen holds aggregate in the bucket for recycling. Drivers can wash down at any location necessary.

Contained Wash-Out System

environmentally correct

no wash-out area needed at your construction site

no costly cleanup issues

Graniterock is pleased to introduce the EnviroGuard Chute Wash System. Unlike some other concrete companies Graniterock provides this service free with every yard of concrete delivery. We are one of the few ready-mix companies in California committed to equip most of our ready-mix trucks with this completely contained wash-out system.

No more need for the owner, general or sub contractor to provide a wash-out area for ready mix trucks; thereby eliminating any contamination, haul out or costly cleanliness issues. This service will free the owner of any potential violations of spillage, and create an "environmentally friendly" jobsite.
